

# Unlock EUDR compliance with one platform

As of December 30th, 2024, any operator or trader of listed commodities on the EU market must prove that the products do not originate from recently deforested land or have contributed to forest degradation.

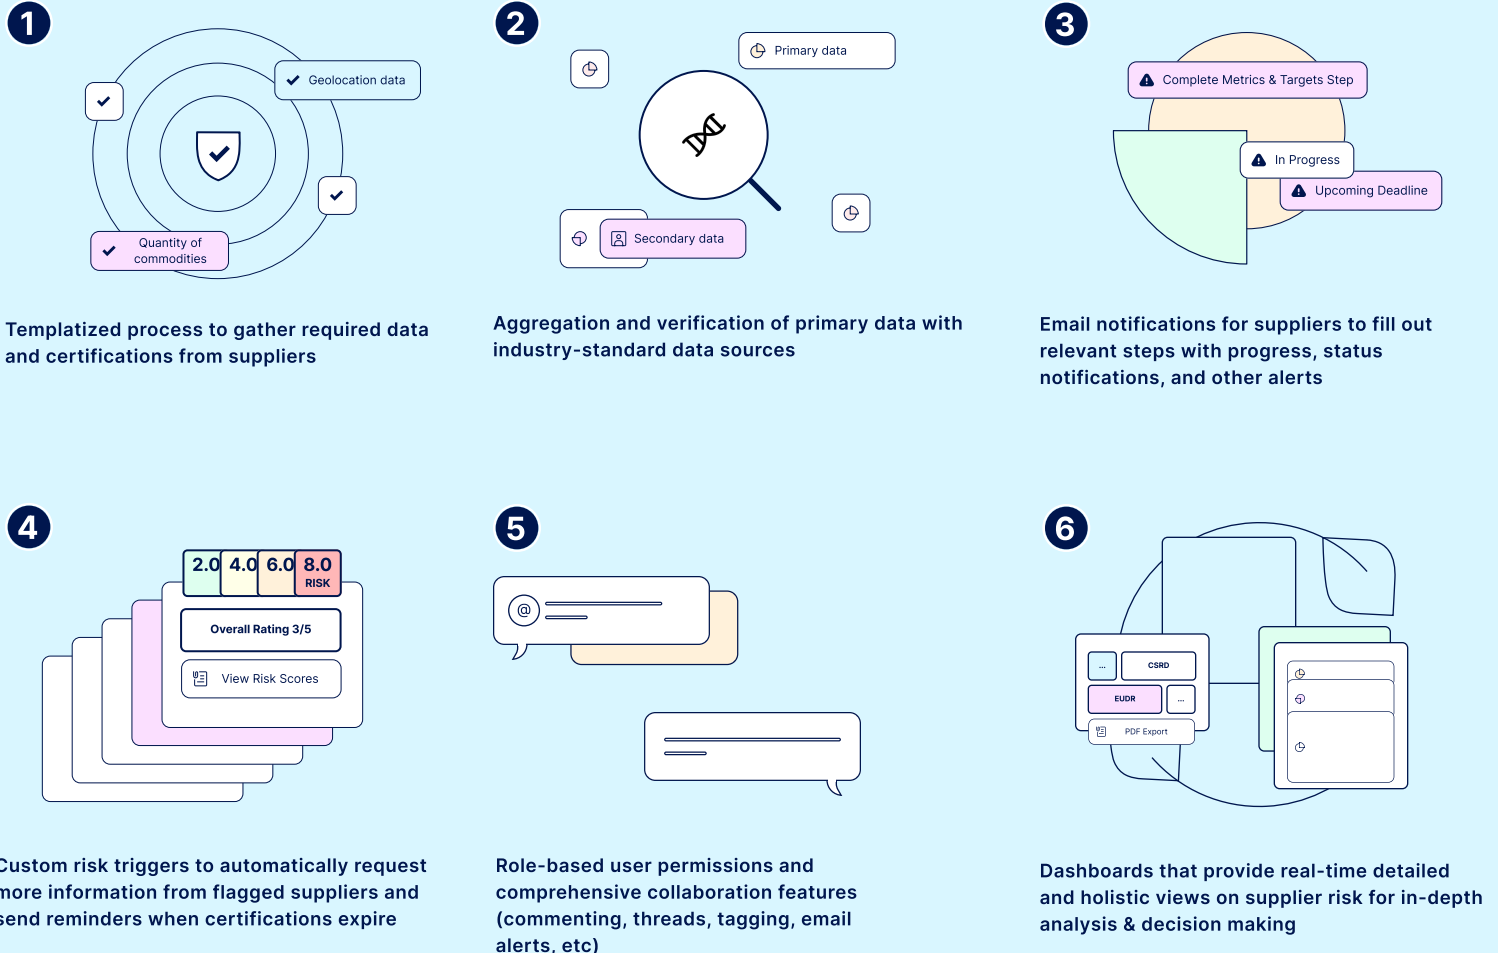

The stakes are high: according to a report by the Carbon Disclosure Project (CDP), “average companies face losses of \$330m due to risk exposure.” Yet, 90% of affected companies are not prepared for the transition.

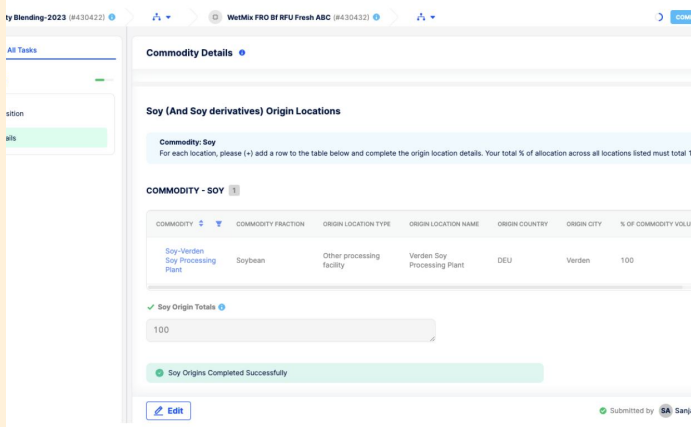

Certa’s EUDR solution enables companies to take decisive action on EUDR by building transparency and engagement among all stakeholders. With robust data collection capabilities, a unified risk assessment product, and a scalable platform, Certa empowers companies to become industry leaders in ESG.

## How does Certa’s EUDR solution work?

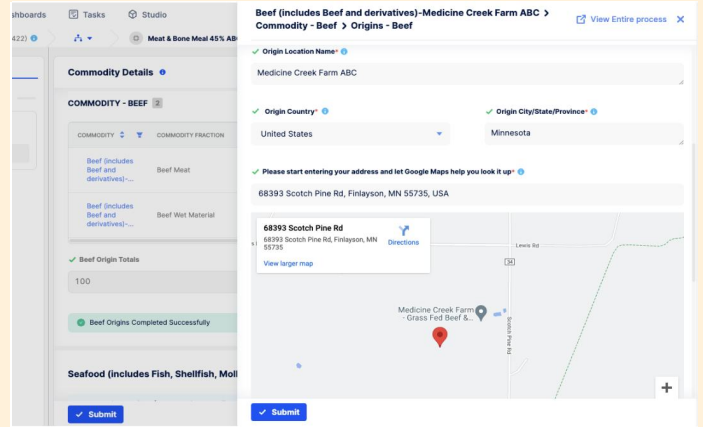

Certa’s ESG product enables companies to manage EUDR needs with a simple, easy-to-use, and customizable platform for data collection, risk assessment, and insights.

### Why Certa?

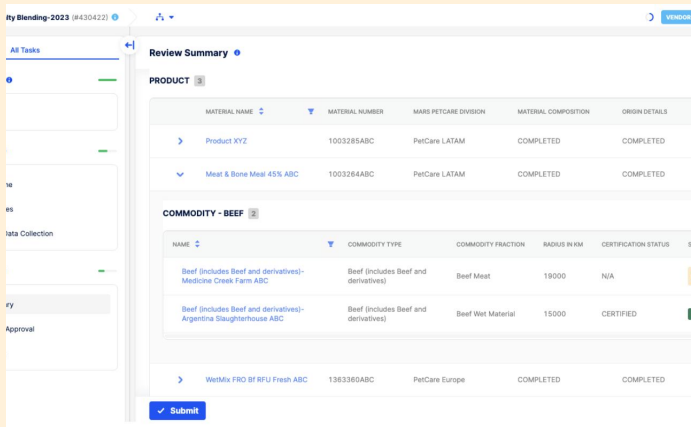

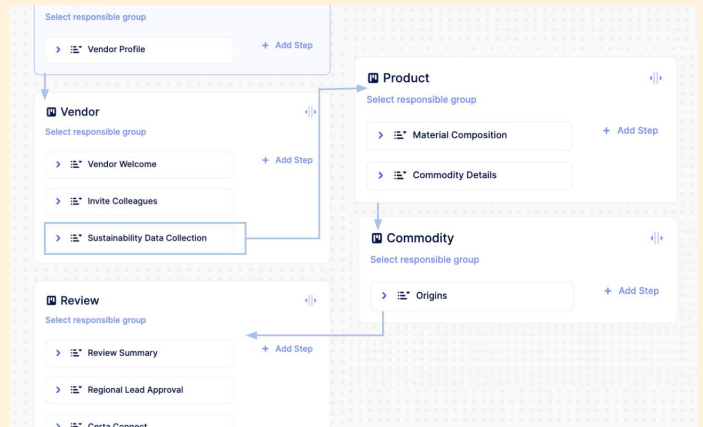

Collect data from suppliers on regulated commodities using a single portal that features a clean, modern UI/UX design.

Utilize templates and questionnaires that ensure compliance with EUDR requirements.

Manage risk through real-time dashboards that provide both product-level and commodity-level overviews.

Automate data gathering across the entire supply chain.

Certa is a SaaS-based workflow automation platform that makes it easy for businesses to manage third party risk, compliance, and ESG. Certa's powerful workflow engine enables businesses to streamline processes, eliminate bottlenecks and inefficiencies, and break down silos via interdepartmental and internal/external process participants. Certa's no-code, drag-and-drop features allow clients to easily modify and customize their workflows to keep up with evolving business needs. By stitching together 100+ enterprise systems and data sources, along with an organization's legacy tech, Certa serves as your single point of intake and source of truth.
