

Scope 3 for CPG Companies

The Sustainable Finance Disclosure Regulation (SFDR) is a transparency framework that dictates what financial market participants have to disclose about their sustainability information.

To comply with these mandatory reporting requirements, organizations must not only collect data about their sustainability measures at the firm level, but also at the level of each individual fund and product.

Certa's helps companies streamline and consolidate their SFDR efforts across the entire portfolio. With Certa, organizations can feel confident that their reporting process is trustworthy, organized, and future-proof.

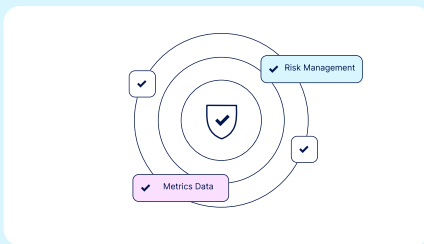

How Certa Can Help

67% of firms classified data as the first or second challenge in building their sustainable investment frameworks.¹ With Certa, gathering the right data doesn't have to be a pain. Certa empowers firms with the following:

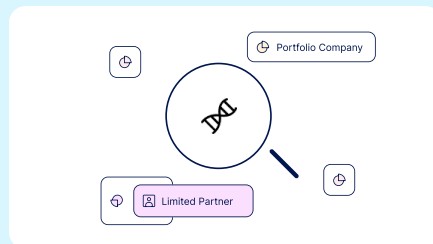

- Data centralization
- Standardized processes
- Scalability and flexibility
- Full transparency

Why Certa?

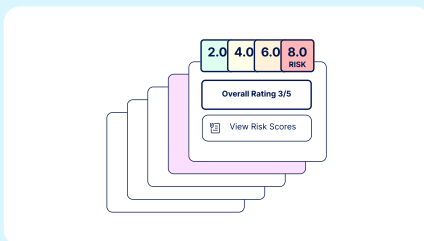

Templatized, guided process to easily gather ESG data across the entire portfolio

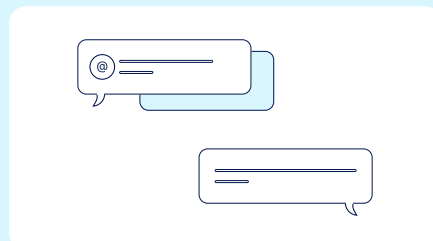

Aggregation (and compliance verification) of disparate data sources (LPs, GPs, portfolio companies)

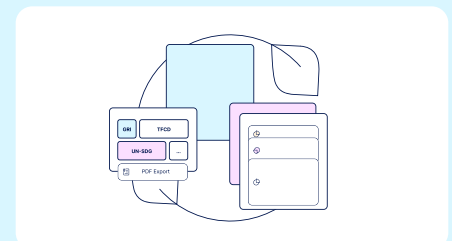

Email notifications for users to fill out relevant steps with progress, status notifications, and other alerts

Custom risk triggers and flagging to help measure disclosure requirements and timelines

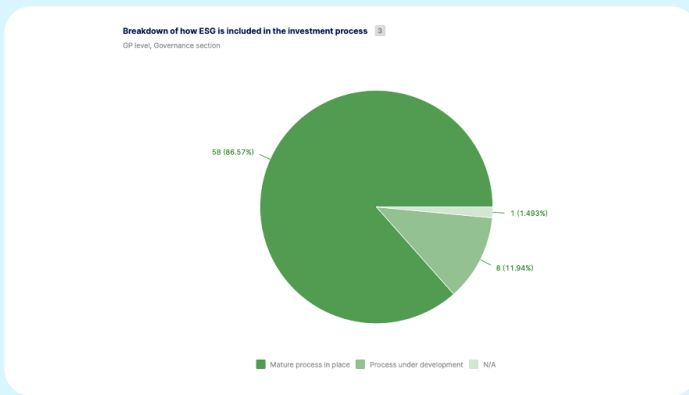

Role-based user permissions and comprehensive collaboration features (commenting, threads, tagging, email alerts, etc)

Visualizations including Total Financed Emissions, Portfolio Carbon Footprint, Portfolio Weighted Average Carbon Intensity, etc. Plus, ready-made product-level and entity-level PDF reports

Collect data with an automated template populated with questions necessary for SFDR

Collaborate with stakeholders throughout the process and receive notifications to stay on top of mentions and important updates

Create exportable visualizations, dashboards, and ready-made reports

Automate data gathering across the entire portfolio

Certa offers personalized solutions for businesses to comply with legal requirements such as Anti-Bribery, Anti-Corruption, covering areas like procurement, risk management, supply chain, and contract management. Key features of Certa's solutions include conducting due diligence on third parties, accessing information from government databases and partners like Moody's and D&B, and efficient management of communications through Certa's platform for full audit transparency.
